

August 11, 2014

Did you know that the 70% of all ink cartridges and 50% of all toner cartridges are not recycled and usually end up in a landfill or incinerator? Did you know that changing the selection of toner you purchase and how you dispose of your used cartridges can actually make a big difference on our environment?

OfficeMax, the University's office supply partner, offers choices that help us improve our environmental stewardship, while reducing our carbon footprint. It is simple. All you have to do is make the "green" choice.

OfficeMax has partnered with Clover Technologies Group [Clover] to offer a more environmentally friendly toner option. Their solutions consume 79% less materials and 51% less natural resources, utilize 48% less energy, and have 44% less impact on our environment. Additionally, their recycled cartridges save an average of over 2 pounds of metal and plastic waste from being deposited in our landfills; they meet or exceed OEM performance; and offer a 100% satisfaction guarantee. Rethink the way you purchase. Select remanufactured toner when you place your next order.

You can also help make UConn a "greener" campus by participating in the *Recycle/Reuse* initiative offered by OfficeMax. Simply complete the on-line form at: <http://www.stores.uconn.edu/forms/form-pickup.html> to schedule a pick up of your empty toner cartridges through Central Stores. OfficeMax accepts all brands of ink and toner cartridges and will pick up your empty cartridges from Central Stores for free.

Help protect the environment select remanufactured toner for your printing needs today and start recycling your empty cartridges. Reducing UConn's carbon footprint is that easy!
